Full-Stack Developer & Graphic Designer

ABOUT ME

I've always been drawn to technology and think I've found a vocation in development, as something that I can infuse with my passion for good design and art. The vast number of tools & skills available to learn also helped inflame a love of learning and improvement. I think anyone can become a developer, but in order to excel you need patience, ingenuity, and a willingness to own up to mistakes as well as successes, all of which are virtues I hope to prove I possess.

English

Russian

MILITARY SERVICE

2017 - 2019   *601st platoon*

Technical Expert, Advisor & Team Leader – I was in charge of combat machinery in the field, which meant I had to quickly learn the ins and outs of my corps tools and be able to pass that knowledge along to combatants and commanders, as well as fix mechanical issues quickly in tense circumstances.
